# 39201 / 39203

## Alemlube Hose Reel Column Stands

The Alemlube hose reel column stand range consists of two models, part number 39201 supports one hose reel and part number 39203 accommodates three hose reels.

The 39201 and 39203 hose reel column stands have been specifically designed to cater for installation in restricted spaces or to allow convenient hose reel access when floor mounting is preferred to wall or gantry mounting.

Presenting an economical, convenient and easily accessible means of oil distribution, these new hose reel column stands from Alemlube are ideally suited to positioning close to service bays and can be connected to distribution systems or operated as independent supply outlets.

Manufacturing is of the highest quality and a durable powdercoat paint finish protects each hose reel column stand and helps it to maintain a clean and professional appearance.
