76100

Vertical Drum Lifter

The 76100 vertical drum lifter provides convenient, safe and easy lifting and repositioning of 205 litre drums. Manufactured in accordance with the test requirements of the Australian Safety Standard AS4991-2004, the 76100 vertical drum lifter is made of high tensile steel and welded construction ensures that the lifter is crack resistant. Capable of lifting a drum with a maximum weight of 500kg, the 5:1 ratio design factor makes easy and efficient work of a normally arduous and time consuming exercise.
