

## PRODUCT INFORMATION

AUGUST 2016

# FAC/T • FAC/E

## Mobile Industrial Fume Extractors

The fully mobile FAC series of industrial fume extractors provide the perfect solution for the removal and filtering of welding fumes from the industrial workplace and satisfies essential OH&S requirements. The fume extractor consists of a sturdy epoxy powdercoated sheet steel frame, an electric fan unit with a statically & dynamically balanced blade impeller, an electronic control panel, a 160mm diameter aluminium articulated arm that can rotate 360° (enabling a work area within a radius of 2.80 metres to be covered) and is available with either mechanical or electrostatic filtration systems.

### FAC/T • MECHANICAL FILTERING

Comprises a metal prefilter, rigid pocket filter and pleated synthetic filter

### FAC/T • ELECTROSTATIC FILTERING

Comprises a metal prefilter, rigid pocket filter and pleated synthetic filter

### PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Complete with wheels (one with a brake) and handles for mobility

Fitted with a resettable hour meter & differential thermal overload cut-out

Weather resistant fan motor ensures a long working life

Airflow rated at 1200 mc/h

Operating power of 1.1 kW

Quiet operating noise level of 73 dH (A)

For use at ambient temperatures ranging between -10°C and 60°C

Maintenance and filter changes are quick and easy to effect

Electrical panel/inspection hatch allows direct access to filtering cells

Dimensions of 830mm(L) x 720mm(W) x 1210mm(H)

Weight of 115kg

Not designed for the filtration of liquids and/or dust

Do not use in explosive atmospheres

### ORDERING INFORMATION

**FAC/T** Mobile Industrial Fume Extractor - mechanical

**FAC/E** Mobile Industrial Fume Extractor - electrostatic
