A14510

Extra-Long Quick Release Grease Gun Coupler BSP

The Alemlube A14510 extra-long quick release grease gun coupler is the latest version of our exclusive quick connect coupler family which already includes the A14512 BSP and A14511 NPT standard length versions.

These game changing patented lock-on grease gun couplers with a lever action and sliding sleeve that securely locks the coupler onto a grease nipple creating a leak proof seal have taken the market by storm.

Hands-free greasing is now a reality!

Lock the A14510 onto a grease nipple simply by depressing the trigger, attaching and releasing the trigger for a tight fit. No hands are needed to align the coupler or keep it on the nipple.

Leak proof greasing - even at extreme angles

Once the A14510 is attached, greasing can be performed at pressures of up to 10,000psi (690bar) - and can be forced to extreme angles on the grease nipple without leaking.

Activate the trigger to disengage - easy release

Simply pressing the trigger releases the coupler from the grease nipple.

PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

135mm in length - great for accessing difficult to reach nipples

Works with all grease gun types - pneumatic, manual and battery

1/8" BSP (f) thread

Maximum working pressure of 10,000psi (690 bar)

Fits all metric and SAE specification grease nipples

4 hardened spring steel jaws resilient under high pressure

Durable nitrile rubber seal for longevity under high pressure

Sliding sleeve locks the quick release coupler onto the nipple

Suitable for high pressure, heavy duty greasing applications

No need to hold while greasing

Lock-on and free up both hands to operate your grease gun

Easy clip-off, regardless of pressure build up in the line

Weighs only 165g

Also suitable for underground coal mine applications
