# 424170

## 20kg Grease Kit with Carry Handle

The heart of the 424170 20kg grease kit with carry handle is the genuinely heavy duty 55:1 ratio grease pump.

The pump's air motor body and cylinder, manufactured from machined aluminium, enables the pump to handle greases up to NLGI2 even in the coldest environments and conditions.

The 70mm diameter air motor with a 35mm stroke facilitates a high delivery rate of 540 grams of grease per minute ensuring that machinery and vehicles are lubricated quickly and efficiently. The lightweight air motor is capable of operating at a maximum pressure of 140psi and will perform faultlessly year after year.

If you're looking for a reliable, trouble free 20kg grease kit with carry handle that will get the job done quickly and efficiently, you can't go past the 424170 for performance and reliability.

### PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

55:1 ratio air motor

Maximum outlet pressure of 7,950psi (550 bar)

Maximum free flow delivery of 540 g/min (at 100psi)

Air pressure operating range of 22psi (1.5 bar) to 140psi (10 bar)

Wetted parts: Steel, NBR and PTFE

Integrated inlet foot valve filter protects the pump from possible foreign particle contamination

Will handle greases up to NLGI2

Quiet operation due to exhaust muffler: 92 dB

Kit comprises a 55:1 ratio pump plus drum cover, follower plate, carry handle, 2 metres of hose, z swivel and control valve

Also available: **424150** 20kg Grease Kit with Trolley

**404100** 20kg Pump only
